		Lori A.	Clow, Ph.D.	1631				
	- The MAILING DATE of this communicate	tion appears on	the cover sheet with the c	orrespondence ac	ldress			
Périod for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).								
Status								
1) 又	Responsive to communication(s) filed of	n 15 Septemb	<u>er 2005</u> .					
· —	•	☐ This action		•				
3)	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is							
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.								
Dispositi	ion of Claims							
4)⊠	Claim(s) 1-18 is/are pending in the app	lication.						
-	4a) Of the above claim(s) is/are v		consideration.					
	Claim(s) is/are allowed.							
6)	Claim(s) is/are rejected.			£				
7)	Claim(s) is/are objected to.	•						
8)⊠	Claim(s) <u>1-18</u> are subject to restriction	and/or election	requirement.					
Application Papers								
9)□	The specification is objected to by the E	xaminer.						
,	The drawing(s) filed on is/are: a)		r b)□ objected to by the I	Examiner.				
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).								
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).								
11)	The oath or declaration is objected to by	the Examiner	. Note the attached Office	Action or form P	ΓO-152.			
Priority ι	ınder 35 U.S.C. § 119							
12)	Acknowledgment is made of a claim for	foreign priority	under 35 U.S.C. § 119(a))-(d) or (f).				
	☐ All b)☐ Some * c)☐ None of:							
1. Certified copies of the priority documents have been received.								
2. Certified copies of the priority documents have been received in Application No								
3. Copies of the certified copies of the priority documents have been received in this National Stage								
application from the International Bureau (PCT Rule 17.2(a)).

Art Unit: 1631

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, drawn to a method for combinatorial consensus mutagenesis, classified in class 702, subclass 20.
- II. Claim 16, drawn to a stabilized variant of beta lactamase, classified in class 435, subclass 183.
- III. Claim 17, drawn to a stabilized variant of carcinoembryonic antigen binder, classified in class 530, subclass 300.
- IV. Claim 18, drawn to a stabilized single chain fragment variable region, classified in class 530, subclass 300.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the invention of Group I is drawn to a method for combinatorial consensus. Claims 16-18 are drawn to variants of amino acids, which have nothing to do with the method of Group I. The inventions are unrelated.

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the invention of Group II is drawn to a variant of beta lactamase. The invention of Group III is drawn to a variant of

Art Unit: 1631

carcinoembryonic antigen binder. The inventions are are independent inventions because they

are directed to different chemical types regarding the critical limitations therein.

directed to different chemical types regarding the critical limitations therein.

Inventions II and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the invention of Group II is drawn to a variant of beta lactamase. The invention of Group IV is drawn to a stabilized single chain fragment variable region. The inventions are independent inventions because they are

Inventions III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the invention of Group III is drawn to a stabilized variant of carcinoembryonic antigen binder. The invention of Group IV is drawn to a stabilized single chain fragment variable region. The inventions are independent inventions because they are directed to different chemical types regarding the critical limitations therein.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Election of Species

This application contains claims directed to the following patentably distinct species:

Application/Control Number: 10/688,255 Page 4

Art Unit: 1631

A. Improved Hits, as in claim 5 and 6. Applicant must elect one method in which the improved hit is either that of claim 5 or that of claim 6.

B. Amino Acid Change, as in claims 16, 17, and 18. Applicant must elect a single amino acid change for each group. For example, if Applicant elects Group 16 for examination,

Applicant must also choose one amino acid change from the group consisting of V11I, V251I etc. for prosecution on the merits.

The species are independent or distinct because the species as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-4 and 7-15 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

-

Art Unit: 1631

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Inquiries

Papers related to this application may be submitted to Technical Center 1600 by facsimile transmission. Papers should be faxed to Technical Center 1600 via the PTO Fax Center. The faxing of such papers must conform with the notices published in the Official Gazette, 1096 OG 30 (November 15, 1988), 1156 OG 61 (November 16, 1993), and 1157 OG 94 (December 28, 1993) (See 37 CFR § 1.6(d)). The Central Fax Center Number is (571) 273-8300.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lori A. Clow, Ph.D., whose telephone number is (571) 272-0715. The examiner can normally be reached on Monday-Friday from 10 am to 6:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Wang can be reached on (571) 272-0811.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to (571) 272-0547.

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of

Art Unit: 1631

document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public.
